

AKASH RAJKUMAR KORE

Full Stack Developer | Java | Spring Boot | React.js | TypeScript | AWS

akashkore1912@gmail.com · +91 8805925386 · Pune, Maharashtra, India · linkedin.com/in/akashkore19 · github.com/akashkore019

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building enterprise web applications using Java, Spring Boot, React.js and TypeScript. Comfortable building REST APIs and microservices end to end, with working knowledge of Python and a solid grasp of OOP principles and design patterns. Worked extensively with relational databases and SQL, AWS services, CI/CD pipelines (GitHub Actions), Git, and Docker-based deployments. Used to working in teams and have used tools like Claude Code as part of the day-to-day workflow.

TECHNICAL SKILLS

Programming Languages: Java (8+), Python (3+), JavaScript (ES6+)

Frontend Technologies: React.js (Hooks, Redux, Context API), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend & Frameworks: Java, Spring Boot, Spring Framework, Hibernate/JPA, REST API Development

Databases: MySQL, PostgreSQL, SQL, MongoDB, DynamoDB

Cloud & DevOps: AWS (API Gateway, S3, EC2), CI/CD Pipelines (GitHub Actions), ECS, Serverless Architectures, Git, GitHub Enterprise

Testing & Methodologies: Jest, Postman, Code Review, Performance Optimisation, AI-Assisted Development Tools (Claude Code)

WORK EXPERIENCE

Senior Software Developer (CRM & ERP Systems) | Xform Technologies Private Limited · April 2026 – Present, Pune, MH

- Leading development of an enterprise CRM and ERP system, with a Java/Spring Boot microservices backend and a React.js/TypeScript frontend, across sales, inventory, and reporting modules.
- Built RESTful APIs and microservices for real-time data sync across 10+ modules, connecting Spring Boot REST controllers to relational databases and SQL-based reports.
- Worked on the microservices backend in Spring Boot with Hibernate/JPA for MySQL, and used MongoDB/DynamoDB where NoSQL fit better, for scalability and high availability.
- Set up role-based access control and JWT-secured APIs using Spring Security filters, and configured CORS to keep enterprise endpoints secure.
- Use Claude Code in day-to-day development for scaffolding, debugging, and documentation; review teammates' code and push for consistent security and performance practices.

Software Developer | Landmark Techedge Private Limited · June 2025 – April 2026, Pune, MH

- Shipped 8+ responsive web applications using React.js (Hooks, Context API, TypeScript) on the frontend and Spring Boot microservices on the backend.
- Built a scalable e-commerce portal with React, Next.js, TypeScript, and MongoDB, added server-side rendering and used lazy loading and code splitting to improve performance.
- Hooked up 15+ REST APIs with Axios, wrote SQL queries against the relational database, and added caching to cut response time by 40%.
- Worked closely with product, design, and QA in an Agile/Scrum setup — sprint planning, story refinement, daily standups, retros.

Software Developer | Xform Technologies Private Limited · March 2024 – June 2025, Pune, MH

- Built and deployed 8+ responsive web interfaces using Java, Spring Boot, React.js, Tailwind CSS, and MySQL, with reusable components and consistent coding standards.
- Built and maintained 3 full stack modules in Spring Boot and MySQL, applying OOP design patterns; automated manual workflows and tuned SQL queries for better performance.
- Improved performance through search filters, pagination, lazy loading, and form validation — cut page load time by 35%.

- Deployed 10+ production apps via HIOX Cloud and GitHub Actions CI/CD; managed Git workflows through GitHub Enterprise and tracked work in JIRA within an Agile/Scrum team.
- Worked with PostgreSQL alongside MySQL, writing complex SQL queries and JPA/Hibernate mappings for data persistence and retrieval.

KEY PROJECTS

Enterprise CRM & ERP System | Xform Technologies Pvt. Ltd. · April 2026 – Present

- Built an enterprise CRM/ERP platform — Java/Spring Boot microservices backend, React.js/TypeScript frontend — covering sales pipelines, customer records, inventory tracking, and reporting.
- Built REST APIs for CRUD operations, third-party integrations, and core business workflows; secured everything with JWT and role-based access.
- Containerized services with Docker and Kubernetes; set up CI/CD pipelines in Jenkins and AWS CodePipeline, with some early work on ECS and serverless options.
- Used MySQL/PostgreSQL for transactional data and DynamoDB/MongoDB where NoSQL made more sense; designed schemas and SQL queries for performance.

Clinic Management Software (CMS) | Xform Technologies Pvt. Ltd. · Dec 2024 – Apr 2025

- Built a CMS with a Java/Spring Boot backend and React.js frontend covering appointment booking, patient records, billing, and inventory.
- Built REST APIs connecting frontend and backend; added CORS and JWT auth, which brought security incidents down to zero.
- Tuned SQL queries through JPA/Hibernate and used Spring's transaction management to keep billing data consistent.
- Wrote unit and integration tests with JUnit, and did code reviews to keep quality consistent across the team.

Cab Booking Platform | Xform Technologies Pvt. Ltd. · Feb 2024 – Jul 2024

- Built a point-to-point travel app — React.js mobile-first UI, Java/Spring Boot backend — for employee pick-up and drop.
- Added real-time GPS tracking and dynamic pricing through Spring Boot background services, with Redis caching to cut API latency.
- Built REST APIs for ride booking, driver management, and payments using AWS services; wrote custom Spring Boot filters for CORS and request validation.
- Wrote end-to-end tests with Postman; deployed on HIOX Cloud with a GitHub Actions CI/CD pipeline.

EDUCATION

M.Sc. Computer Science · 2024

MIT Arts, Commerce & Science College (MITACSC), Pune · CGPA: 7.60 / 10

B.Sc. Computer Science · 2021

S.N.B.P College of Arts, Commerce and Science, Pimpri, Pune · CGPA: 7.80 / 10

CERTIFICATIONS & CONTINUOUS LEARNING

Advanced Spring Boot Microservices Development · React.js Professional Training · AWS Fundamentals (in progress)

CORE COMPETENCIES

Java · Python · Spring Boot · React.js · JavaScript (ES6+) · REST API Development · Microservices · OOP & Design Patterns · MySQL · PostgreSQL · SQL · MongoDB · Hibernate · JPA · AWS (API Gateway, S3) · CI/CD · AWS Code Pipeline · ECS · Serverless · Git · GitHub Actions · Agile/Scrum · Postman · Claude Code · Full Stack Development · Code Review · Performance Optimization
